

The hub, as its users meet it.

A review of structure, naming, gaps and consistency across the COOKT brand hub, traced through the jobs of eight kinds of people who will use it. Includes a line-by-line check of the DeepSeek audit.

Reviewed	<code>jalulia.github.io/cookt</code>
Build	<code>v0.15.2 · commit e51adf7</code>
Checked	<code>30 Sep 2026, live and source</code>
Viewports	<code>1440 × 900 · 390 × 844</code>
Canon used	<code>Rebrand R2 (24 Sep) · Strategy Distillation (26 Aug) · COOKT copy rules</code>
Scope	<code>Review only. No hub or Codex files changed.</code>

SUMMARY

Strong artwork and photography guidance, organized as a review tracker rather than a system people can work from.

WORKS

- + **Per-dish packaging records.** Every front, back and side option, the palette, and an editable .ai file per dish and per format.
- + **Photography guide.** Shots chosen by job, a capture list, set and color rules, and four acceptance tests. The most usable part of the hub.
- + **One data record drives the site.** Product colors, names and statuses come from a single file, so fixes propagate.

BREAKS

- 1 **No stable model.** The same things live in several places under different names: DTC appears in five places, plates in four, color in four.
- 2 **Decided and open look the same.** 25 different status labels. D1 alone carries four statuses on four pages.
- 3 **Production and digital users cannot finish their jobs.** No type specification, no print color values, no carton dimensions, no logo usage rules.
- 4 **The platform page removes its own context.** R2 explains "We make American food"; the hub shows the line without the explanation or the proof points, including halal.

18.6k px on one Packaging page (26.9k on mobile)	25 distinct status labels in the data	5 places DTC work lives
0 typography specifications	180 hex values in the hub's own CSS	2 sets of launch product names on show

FIRST FIVE FIXES, IN ORDER

- 1 One status model with a legend, and a single status for D1.
- 2 Restore the R2 platform frame: WHO / HOW / WHERE, the American-food gloss, the proof line.
- 3 One product taxonomy: Range, Channel, Format. Retire "Frozen pack" as a label.
- 4 Split Packaging into a system page and four dish pages.
- 5 Add the missing specification pages: Type, Logo usage, Production.

HOW THIS WAS CHECKED

Every claim was traced to the live build, the source data, or the client-approved deck.

01 / LIVE BUILD 22 routes × 2 viewports Rendered headless at 1440 × 900 and 390 × 844. Page text, headings, links, titles, overflow, console errors and failed requests captured per route. Zero failed requests, zero console errors.	02 / SOURCE Repository at e51adf7 data.js parsed as a record (2,132 lines), app.js router and search read, CSS tokens counted. Git history used to date wording changes between v0.12 and v0.15.	03 / CANON What the hub should reflect Rebrand R2 deck text (24 Sep), Strategy Distillation (26 Aug), COOKT-COPY-RULES.md, the 29 Sep handoff notes, getcookt.com. Read only.	04 / DEEPSEEK 22 claims tested Each claim checked against the same sources. Its photography and name quotes come from v0.12, three builds before the current one. Verdicts on boards 20–21.
---	---	--	--

SEVERITY USED IN THIS REPORT

LEVEL	MEANING
BLOCKS	A user cannot complete a core job, or the hub states something false.
MISLEADS	The job can be done, but the hub points people to the wrong place, name or status.
FRICTION	Slower or noisier than it needs to be.

LIMITS

- No user testing. Journeys are reconstructed from roles on the account and standard brand-system use.
- The internal build (Project desk, Documents tab) was not reviewed; only the public client export.
- Artwork quality is out of scope; this is about structure, naming and the information people need.

Eight kinds of user, each with one job that brings them in.

The hub currently serves the first two well and the rest in patches. Most of the gaps on later boards come from designing for a review meeting, not for the people who apply the brand afterward.

Each cell is backed by a finding on boards 06-19.

"What do you need from me this week?"

BLOCKS

- 1 **Lands on a welcome.** The first two screens are a tagline, a photograph and four portals. The six open items sit at the bottom of the page, about 2,000 px down.
- 2 **Finds "On the table."** Six items labeled Present Revise For review Confirm . None says who acts. "Present" is ø co.'s job; "Confirm" reads as COOKT's; "For review" could be either.
- 3 **Clicks "Confirm format and finish."** Lands 12,137 px into the Packaging page. Nothing on the page records an answer, a due date or options to choose between.
- 4 **Leaves to email or a call.** Every decision round-trips outside the hub, so the hub's "Feedback" sections only ever show ø co.'s summary of the last round.

FIX

Open the Index with a **Decisions** block: decision, options (with thumbnails), who decides, due date, state. Move the welcome and portals below it. Rename action labels by actor: COOKT to decide ø co. presenting Supplier to confirm .

"Send me what I need to build the Orzo carton."

BLOCKS

WHAT THEY NEED / WHAT THE HUB GIVES

NEED	IN THE HUB	STATE
Editable artwork	COOKT-Frozen-Orzo-Editable-v007.ai, 6.3 MB	
Dieline and dimensions	"Landscape carton; supplier dimensions and dieline pending"	
Print color	Screen hex only. "Screen values / confirm with print proofs." No CMYK, Pantone or ink sequence.	
Substrate and finish	"Matte background and selective gloss on the wordmark." No board, coating or varnish spec.	
Legal copy	Placeholders on art: XXg, NET WT. XX OZ (XXX g). Ingredients, allergens, preparation "Pending".	
Halal mark	Generic circular badge. Certifier artwork "Pending approved certifier artwork and evidence".	
Front-panel order	Seven-item hierarchy list, plus three exclusions.	

Pending items are expected at this stage. The problem is that they are scattered across per-dish drawers, a "Before production" list and captions, with no owner or date. A supplier cannot tell what is missing from what was never going to be in the hub.

Packaging > Panels & production, at 12,137 px on a single page.

FIX

A **Production** page with one spec sheet per SKU and format. Every field present from day one, empty ones marked with owner and due date: dimensions, dieline, board, coating, print colors (CMYK + spot), legal panel copy, certifier artwork, barcode. Link the .ai from the sheet.

Best-served user. One regression: the pack-shot spec was removed.

MISLEADS

What does this image need to do?		
Job / touchpoint	Photograph	Why / composition
Win attention Homepage / campaign / paid social	 Graphic table	A clear silhouette and bold field read fast. Compose the copy side before placing the plate. Overhead or steep oblique
Choose a meal Menu / range / product listing	 Complete dish	A consistent angle and scale make comparison easy. Keep the complete rim and a clear border. True overhead, full ceramic
Want the next bite Product page / food carousel	 Close appetite	Texture explains the appeal that a small menu tile cannot. Focus on the cut face, sauce and one recognizable ingredient. Three-quarter close-up
See it in my day Brand story / CRM / organic social	 Setting + implied presence	The table and surrounding details suggest a moment in the day. Use the chair, glass and light to establish the occasion. Keep faces and full people out. Across the table or a wider setting
Feel the shared moment Social / community / editorial	 Hands at the table	Gestures create connection while food remains the subject. Capture the pause, action and clean table version. Overhead or dining height
Recognize what arrives Commerce / retail / delivery explanation	 Package / artwork reference	The exact current artwork and physical format must be clear. Keep artwork, proportions and the curated dish styling consistent. Use the established package angle
Photography direction - In review		
COOKT / Photography		
BUILD FOR THE PLACEMENT		
		Composition / alternate captures

Brand > Photography > "What does this image need to do?" Six jobs, each with shot, angle and frame.

V0.12 • 29 SEP, MORNING "Use the R2 three-quarter bowl view on packaging. Show the inside of the bowl and its front lip." "One hard upper-left key across the range ... a dense lower-right cast shadow."	V0.15.2 • LIVE "Use the established package angle." "Use a small, defined source from the side or behind." The angle is referenced but defined nowhere. Light direction is now open.
--	--

WORKS

- + Shot chosen by job, with touchpoint, angle and frame.
- + Capture list per dish, format coverage (landscape, 4:5, 9:16) and delivery naming.
- + Four acceptance tests every selected image must pass.

GAPS

- 1 **Pack photography is "largely locked" but not written down.** The v0.12 angle and key-light rule should return as a locked spec: camera height, angle, crop, key position, shadow direction.
- 2 **Ceramics are named, not specified.** Four plate names and notes; no maker, glaze reference or size for sourcing.
- 3 **Two copies of the guide.** Embedded page and photography-guide.html; Library lists it twice ("Photography world" and "Photography direction studies") pointing to the same route.

"Which typeface, which sizes, which colors on screen?"

BLOCKS

- 1

No type page exists. Brand has Platform, Logo, Color, Photography, Guidelines. Guidelines says: "Simple sans for the hub. Pack typography awaits its final specification."
- 2

The hub does not load its own face. CSS asks for International with no @font-face, so anyone without it installed sees Helvetica or Arial. Library lists "International · Working typeface" with no file, license note or weights.
- 3

Three type treatments, no rule linking them. Pack names in a geometric sans; website comps in heavy caps; the hub in International/Helvetica.
- 4

The comps show retired names. Website and email proposals still read "Jamaican Rasta Pasta" and "Lemon Orzo Pasta", renamed on 29 Sep. The hub pins these images to earlier published content.
- 5

No digital color tokens. Four product hexes and three brand swatches; no text/background pairings, no states, no contrast guidance.

Applications > Revised applications. Launch strip reads "Jamaican Rasta Pasta" and "Lemon Orzo Pasta".

FIX

Add **Brand > Type**: pack face, digital face, weights, scale, casing rules for dish names and the brand line, and licensing. Load the licensed webfont in the hub or show specimens as images. Re-export the web and email comps with current names, or caption them "R2 names".

Five sections, but topics are split across them.

MISLEADS

Index #/ 	Brand #/brand	Packaging #/packaging	Applications #/applications	Library #/library

"Guidelines"	Status grid, no rules
"Documents ↗"	Assets grid
"Logos", "All assets"	Same page
"DTC packaging"	Applications top

Twelve sub-routes, one page. DTC dishes start sixteen screens down.

FRICTION

18,645 px · ticks = one 900 px screen

- 1 **Every sub-route renders the whole page and scrolls.** `#/packaging/palette`, `/production`, `/plates`, `/dtc` and each dish are anchors on one 18,645 px document, 26,885 px on a phone.
- 2 **Tab order is not reading order.** The tab bar reads Range, dishes, Palette, Production, Plates, DTC dishes. On the page, "Round 02 / Earlier reference" sits between Feedback and the plates.
- 3 **Brand-level material sits inside one channel.** The launch plates and the 26-dish DTC catalog are not packaging.
- 4 **Headings do not change.** Every Brand sub-page has the title "COOKT — Brand" and an H1 of "Brand", so shared links and browser tabs are indistinguishable.

FIX

Packaging becomes a **System** page (structure, palette, front-panel hierarchy, heat scale) plus four **dish pages**. Plates move to Photography; the DTC catalog moves to Range. Each page gets its own title: "COOKT — Lemon Chicken Orzo".

Three separate ideas share one set of words: range, channel and format.

MISLEADS

TODAY: TERMS IN USE, ONE PER BOX

- 1 **"Frozen pack" vs "DTC sleeve"**. Both are frozen. The tab pair sets a state against a channel.
- 2 **"Launch" is stored as a channel**. It is a range. The same four dishes also ship DTC in sleeves.
- 3 **"DTC dishes" live under Packaging**. They are catalog records with no packaging work; 19 of 26 have no image.
- 4 **Plates are a product attribute stored as photography**. Each dish owns one ceramic; that belongs on the dish record.

PROPOSED: ONE RECORD, SEPARATE AXES

Tabs on a dish page become **Retail carton** and **DTC sleeve**. The range filter reads **Launch four / DTC catalog**. Files follow the same words: COOKT-Carton-Orzo-v007.ai, COOKT-Sleeve-Orzo-v007.ai.

25 labels answer three different questions at once.

BLOCKS

ONE MARK, FOUR STATUSES

Open image ↗

Deep green

ck and white

Applications > Website comp, as published.

COLOR NAMES FOR THE SAME VALUES

VALUE	CALLED
 #103E2C	Dark green · Deep green · Forest · darker green; also the brand's Deep green
 #123C2B	R2 "Forest". Still the ink on all 26 DTC tiles and the favicon
 #1B2868	rich blue · richer blue · navy ("Lemon & navy" in Locked)
 #171D53	R2 "Navy". No longer used; name survived
 #351B13	Deep, rich brown · Chipotle brown · deep brown
 #CB3D25	Paprika · paprika red

Fix: one name per value, set on the Color page: Forest, Paprika, Lemon / Rich blue, Chipotle. Decide whether the brand green and the Rasta field should stay identical; today the Rasta carton is also the brand's default color.

Most rules hold. Four either contradict the artwork or each other.

01 • CONTRADICTS THE ARTWORK

"Carry each secondary color through the ceramic."

Blackened's palette is paprika and cream. Its plate is "Ivory / blue brush". Blue belongs to Orzo. Either the rule has an exception or Blackened's secondary is blue; the hub says neither.

02 • POSSIBLE LABEL COMPLIANCE ISSUE

"Keep off the front: tagline, serving suggestion, keep frozen."

For poultry products needing special handling, 9 CFR 381.125(a) requires "Keep Frozen" or a similar statement on the principal display panel. These are chicken dishes. The copy rules already log a conflict with the Pack Copy doc. **Confirm with the co-packer or a label consultant before print.** This is not legal advice.

03 • RULE STATED IN ONE PLACE, BROKEN IN ANOTHER

"Yellow belongs to Lemon Chicken Orzo and selected accents."

Rasta's ceramic carries a yellow brush, and the hero and campaign studies use a butter-yellow field. The photography page limits this ("a campaign set, not new SKU color coding"); the Color page, where people look, does not. Move the exception to the Color page.

04 • AMBIGUOUS WORDING

"Latin-only wordmark; halal kept separate."

Means the halal mark is separate from the wordmark. Reads as separate from the pack. Rewrite: "The wordmark is Latin only. The halal mark sits in the information band, never locked to the wordmark."

05 • ORIGIN LINE IS ALSO A CLAIM

"COOKT in the USA"

Reads as a processing-step origin claim. FSIS's U.S.-origin rule (compliance from 1 Jan 2026) allows step claims only when they state the step accurately. Already marked "substantiation pending"; add it to a claims register with an owner.

The hub keeps the lines and drops the frame that makes them work.

MISLEADS

REBRAND R2, CLIENT-APPROVED

WHO	People with more appetite than time.	●
HOW	Distinctive, cravable frozen meals with standards that stand up to scrutiny.	●
WHERE	The frozen food aisle to the final bite.	○
LENS	We make American food. "American food, honestly shared, has always been different cultures in conversation, arriving at the table as themselves."	◐
PROOF	From the brand story: "Halal certified. Sourcing verified."	○
STRATEGY	"Halal architecture. Certification made visible and verifiable, carrying quality without being merchandised into specialty." · "Lead with the meal. Prove the standard. Earn the repeat."	○

● on the hub ◐ line only ○ absent

FIX

Label the lines WHO, HOW, WHERE as R2 does. Put the R2 gloss under "We make American food." Add a **Proof** row (halal certified, sourcing verified, chef-cooked), each tied to evidence in a claims register. Halal stays proof, not headline, which matches the Strategy Distillation.

Brand > Platform, live. Four lines with no labels; the "American food" explanation and the proof line are not shown.

Leave the R2 lines alone. Rewrite the hub's own voice.

FRICTION

WHERE	HUB LINE	PROBLEM	REPLACE WITH
Index	Make yourself at home. / Four ways into the world of COOKT.	Welcome filler	Drop the heading; the four sections label themselves.
Index	Our identity, packaging, and creative work. Everything you need to make it COOKT.	Promise the hub does not keep	COOKT identity, packaging and applications. Round 03, in review.
Index	READY WHEN YOU ARE / The essentials.	Filler kicker	Quick links
Index	IN DEVELOPMENT / On the table. Current work and the next decisions.	Idiom as a heading	Decisions
Index	The big idea, and the details that make it ours.	Vague	Platform, logo, color, photography.
Index	A useful collection of logos, photography, and brand assets.	"A useful collection"	Logos, typeface, palettes, photography, files.
Packaging	A full height signature. A shared structure.	Slogan heading	Pack system
Packaging	The signature sets the scale. / The food comes close.	Aphorism headings	Wordmark: full pack height / Food: large angled bowl crop
Photography	Let the meal lead. Gestures give the picture a reason. Make the texture tangible. Capture the family, not just the hero. Keep the standard visible.	Aphorism headings	Graphic table · Hands at the table · Food styling · Coverage per dish · Shoot to delivery
Applications	Sam's current brand headline and first paragraph are included.	Names a person and the process	Brand headline and first paragraph: draft copy, in review.
Everywhere	"identity, packaging, and creative" vs "identity, color, food and DTC sleeves"	Serial comma used in 3 places, dropped elsewhere	No serial comma, matching the data and packs.
Everywhere	"A fresh recipe for frozen." "A FRESH RECIPE FOR FROZEN"	Two casings, one with a period	Caps on pack; sentence case in running text; no period.

Not on this list: the four R2 platform lines and the brand line. They are client canon. "Cravable" is an accepted variant of "craveable"; change it in R2 first if at all.

Scraped nutrition is shown as fact, and conflicting values are dropped silently.

BLOCKS

15 complete macro sets	7 partial, value dropped with no mark	4 empty	3 source pages contradict themselves
---------------------------	--	------------	---

DISH	SOURCE SAYS	HUB SHOWS
North African Honey Harissa	730 kcal / Calories: 590	no calories
Smokey Chipotle Chicken bowl	790 kcal / Calories: 650	no calories
Spaghetti Puttanesca	620 kcal / Calories: 600	no calories
Asian Sesame Salmon	Fat: "2 6 g"	fat omitted
Southern Style Brisket	Carbohydrates: "4 7 g" · \$29.98	carbs omitted · price with no pack size

The footnote says these are not approved claims, but the tiles set them in the same type as the launch records. Fix: link each tile to its live product page and drop the macros, or show them with "source value" and a conflict flag.

DTC records observed on getcookt.com, 25 Sep 2026.

CORRECTNESS AND EXPOSURE

- 1 **Public repository.** github.com/jalulia/cookt is public. The site is noindex, but the data file, scraped prices and nutrition, and eight .ai files (authorized for download on 29 Sep) are world-readable. Confirm that is intended, or gate it.
- 2 **README says v0.10.0.** Live is v0.15.2.
- 3 **Unknown routes are inconsistent.** #/identity shows "Page not found" with the tab title "COOKT — Identity"; #/brand/typography silently shows Platform.
- 4 **Search matches titles only,** 12 results at most. "halal", "tagline", "net weight" and any hex value return nothing.
- 5 **"Documents ↗" opens the asset grid.** The public build hides the Documents tab, so R2 and the Strategy are unreachable.
- 6 **Paprika with cream is 4.25:1.** Below 4.5:1 for small text. Check the net-weight line on Blackened at print size.

A brand hub that does not use tokens drifts from the brand it documents.

FRICTION

180 unique hex values	143 of them used once or twice
21 var() references in 147 KB of CSS	53 distinct font sizes
0 @font-face rules	6 greens standing in for one brand green

Why it matters to users, not just to the build: when the Color page changes, the hub chrome does not follow, so the hub shows off-brand greens next to the values it tells people to use. The next person to extend the hub has no tokens to copy.

FIX

Generate CSS tokens from brandColors and the dish palettes in data.js: paper, ink, green, four fields, four inks, two greys. One type scale of eight steps. Load the licensed face.

GREENS IN USE

#103E2C is the brand green. #123C2B is the R2 value, still on DTC tiles. The rest are one-off literals.

SECONDARY TEXT GREYS IN USE

Ten values for one role. At normal viewing they are indistinguishable.

It read a build three versions old and had no access to R2.

CONFIRMED

PARTLY

REFUTED

STALE

OUT OF SCOPE

NOT ADOPTED

#	DEEPSEEK CLAIM	VERDICT	EVIDENCE AND ACTION
01	Hub is v0.10.0	STALE	README is out of date; the live build is v0.15.2. Fix the README.
02	Photography rules: "R2 three-quarter bowl view", "one hard upper-left key"	STALE	Quoted from v0.12. Removed at v0.15.0. The removal is itself a gap (board 08).
03	Names "Jamaican Rasta Pasta", "Lemon Orzo Pasta"	STALE	Renamed 29 Sep. Old names survive in the web and email comps (board 14).
04	"Cravable" is a misspelling and an LLM tell	REFUTED	Accepted variant per Dictionary.com. Verbatim from R2 page 2, client-approved.
05	"We make American food" contradicts a Jamaican, Mediterranean, Mexican range	REFUTED	R2 page 3 defines American food as cultures in conversation. The hub omits that gloss: fix the page, not the line.
06	Platform never mentions halal	CONFIRMED	True on the hub. R2 and the Strategy treat halal as proof. Add a Proof row; do not make it the headline.
07	Tagline is a rule with no specified use	REFUTED	It runs on every back and side option. The placement rule is implied by the art, not written. Write it.
08	Uniform "Pending" fields are an LLM template	REFUTED	Deliberate placeholders under the copy rules (XXg, NET WT. XX OZ). Real issue: no owner or due date.
09	"Make yourself at home", "Ready when you are", "Everything you need to make it COOKT" are generic	CONFIRMED	Hub-authored, not R2. Rewrite (board 17).
10	"Standards that stand up to scrutiny" is a cliché	OUT OF SCOPE	R2 canon. Raise with the client only if the platform reopens.
11	"Lemon & navy" vs "rich blue"	CONFIRMED	"Navy" is the R2 swatch #171D53; current ink is #1B2868. Rename.

Seven of 22 claims hold outright. It missed the structural problems.

#	DEEPSEEK CLAIM	VERDICT	EVIDENCE AND ACTION
12	"Halal kept separate" conflicts with a halal badge on pack	PARTLY	Means separate from the wordmark. Wording is ambiguous; rewrite.
13	"D1 · In development" badge on every page, including home	PARTLY	Not on the Index. The real issue: D1 shows four different statuses.
14	No downloadable assets or guidelines PDF	PARTLY	SVG logos and eight .ai files download. No guidelines PDF, photography files or fonts.
15	Search scope unclear	CONFIRMED	Titles only, 12 results. Body text, hex values and rules are not indexed.
16	No Do / Don't examples	CONFIRMED	No clear space, minimum size or misuse for the logo. No type rules at all.
17	Status taxonomy lacks a glossary	CONFIRMED	25 labels across three different questions (board 13).
18	Hub may describe a different COOKT from getcookt.com	REFUTED	Same company. All 26 getcookt.com dishes are records in the hub.
19	Add KPIs, brand-health metrics, competitive context	NOT ADOPTED	Belongs in strategy documents. Link the Strategy Distillation from the hub instead.
20	Make the hub a sales tool for retail buyers	NOT ADOPTED	Buyers get sell sheets. The hub needs an audience statement and a link to them.
21	"Owner" field exists but is hidden	CONFIRMED	Low priority. Owners are sections, not people. Replace with "next actor".
22	Remove the D1 badge from client views	PARTLY	Replace with the status legend, not removal.

Counts cover all 22 claims across boards 20-21.

7 confirmed	4 partly	5 refuted
3 stale	2 not adopted	1 out of scope

NOT IN THE DEEPSEEK AUDIT

- Duplicated IA: DTC in five places, plates in four
- Packaging page is 18,645 px; every sub-route is an anchor
- Web and email comps show retired names
- "Keep frozen" removal vs 9 CFR 381.125(a)
- Hub CSS: 180 hex values, no loaded brand face
- Scraped nutrition conflicts dropped without a flag
- Blackened ceramic breaks the secondary-color rule
- Platform page drops the R2 frame and proof line

PLAN

Nine fixes need no client input. Six need COOKT or a supplier.

#	WHEN	FIX	OWNER	BOARD
01	Now	One status model with legend; one status for D1	Ø co.	13
02	Now	Platform page: R2 labels, gloss and proof line, verbatim	Ø co.	16
03	Now	Range / Channel / Format labels; retire "Frozen pack", "grocery", "launch" as channel	Ø co.	12
04	Now	Fix names: Locked strip, "Lemon & navy", web and email comps	Ø co.	14
05	Now	Split Packaging; page titles; consistent not-found handling	Ø co.	11
06	Now	Rewrite hub-authored copy; one comma style; one tagline casing	Ø co.	17
07	Now	Write the Blackened ceramic and yellow exceptions on the Color page	Ø co.	15
08	Now	DTC tiles: link to source, drop or flag scraped macros, show pack sizes	Ø co.	18
09	Now	README version; decide repo visibility; index body text in search	Ø co.	18
10	Next	Decisions block and a way to respond: in the hub or a linked form	COOKT	06
11	Next	"Keep frozen" on the front panel: confirm FSIS labeling before print	COOKT + co-packer	15
12	Next	Type page: pack and digital faces, scale, licenses; load the webfont	COOKT + Ø co.	09
13	Next	Production spec sheet per SKU × format, empty fields owned and dated	Supplier	07
14	Next	Claims register: halal certifier art, "COOKT in the USA", protein, heat	COOKT	15
15	Next	Lock the pack-shot spec: angle, height, key light, shadow	Photographer	08

LATER

- Voice page from the R2 brand story.
- Logo usage: clear space, minimum sizes, backgrounds, misuse.
- Token refactor of the hub CSS.
- Changelog of rounds and versions.

ORDER OF WORK

1–3 first: status, platform and taxonomy change the words everything else uses. Then 4–9 in any order. 10–15 need an answer from someone outside Ø co.; raise them together at the next client review.

APPENDIX

Routes tested and sources.
