STILL TO MAKE

Shot gaps / production dependencies

Alternate launch plates Launch dishes / High For each of four dishes, capture a second accurate plating, full ceramic and close appetite crop.
Matched angle set Launch dishes / High True overhead, established packaging angle and fork-level detail for each launch dish with consistent ceramic and light.
DTC plate coverage DTC dishes / High Photograph the live DTC assortment as complete overhead dishes; replace the seven catalog or concept images and fill products without imagery after assortment confirmation.
Dedicated formats Product images / High Compose landscape, 4:5 portrait and 9:16 vertical captures for each selected product image; do not crop a horizontal source into every format.
Clean product views Product images / High Capture food-only full plate and tight ingredient detail for each confirmed SKU, plus front and side packaging views after dieline approval.
Scene alternatives Lifestyle / Medium Capture left- and right-copy space, clean table, hands entering and no-hands versions in the selected shared-table direction.
Current artwork on physical packs Retail packs / High Re-render lit studio, table, overhead and four single cartons with the current full-height v013 fronts after supplier dimensions and print proofs are confirmed.
Accurate DTC sleeve studies DTC sleeves / High Render photo and type sleeve options at confirmed physical proportions with front, side and back visibility. Earlier cuboid studies were rejected.
