COOKT / THE DTC EXPERIENCE

DESIGN PR

The program is there. Make it easier to use.

01 / ORDERING

A box built around the food.

Keep one-time orders, subscriptions and the 7-30 meal builder. Improve the food presentation and selection controls.

02 / ACCOUNT

Useful from the first visit.

Keep Shop and email sign-in. Give new customers a clear start and subscribers a clear next order.

03 / BENEFITS

Make existing rewards visible.

Carry through the first-order offer, four-order gift card, cash-back credits and referral program.

Orders / subscriptions

A system with range.

Large food crops, clear type and dish colors create variety across storefront, email and packaging.

01 Vertical signature.

A vertical signature anchors expansive imagery without competing with the dish name.

02 Oversized food.

Oversized, offset crops give editorial modules movement and appetite.

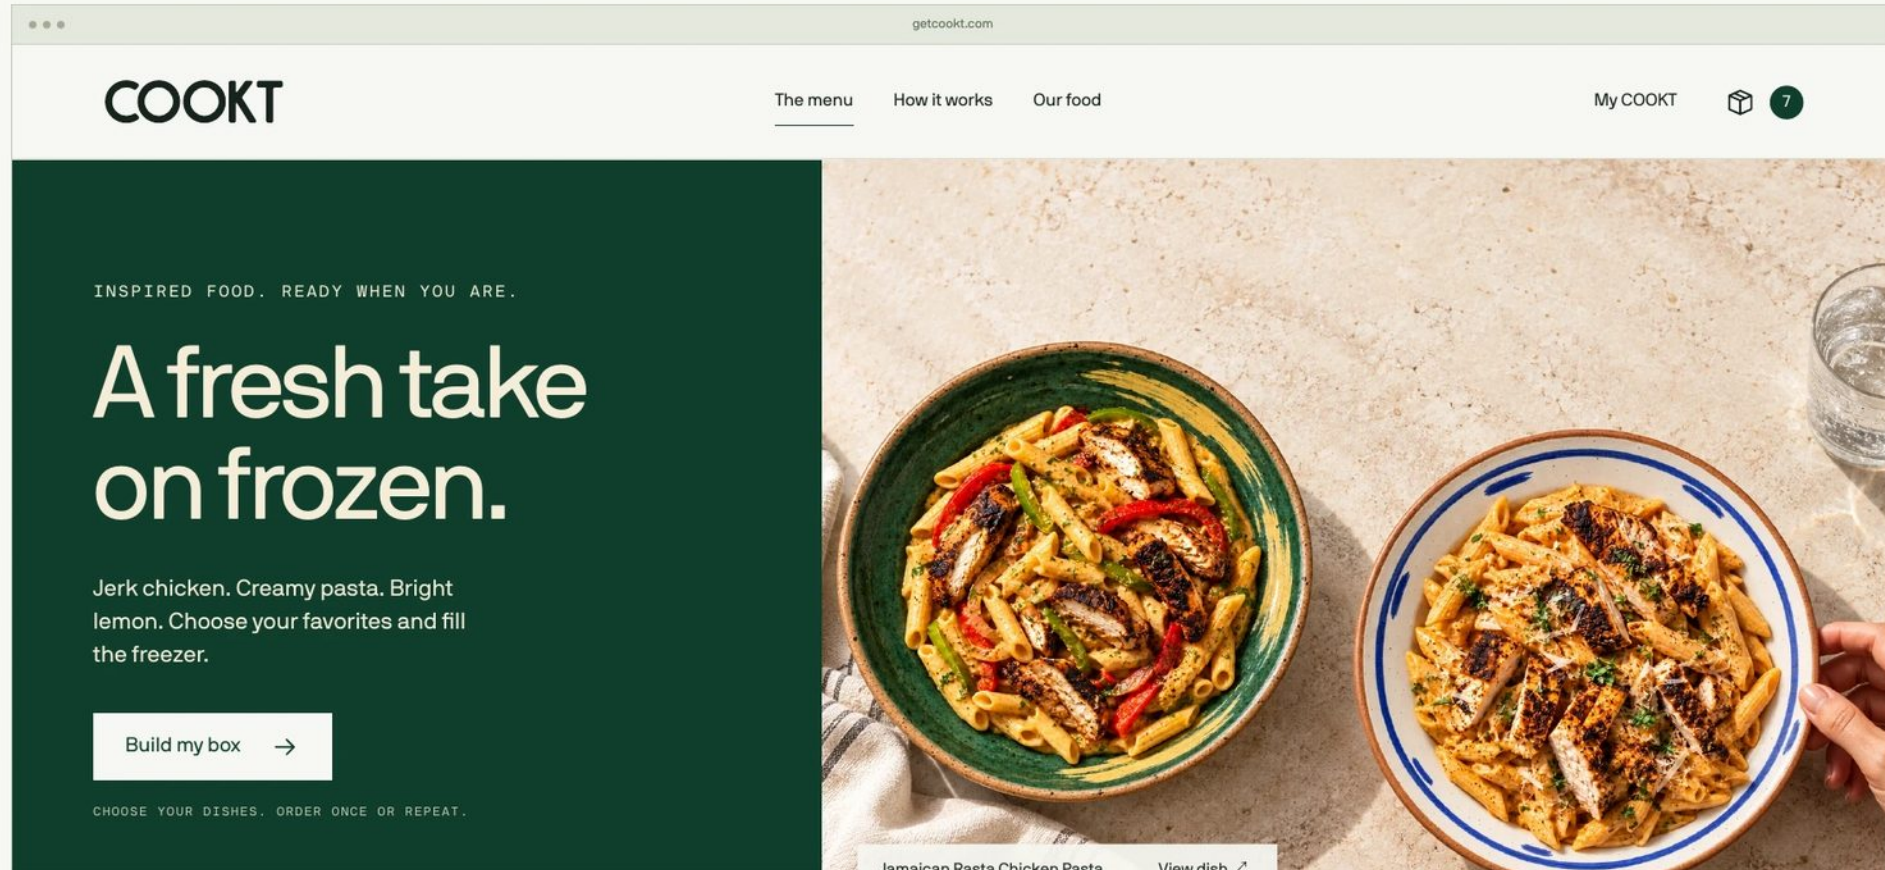

03 Adapt the layout.

Generous discovery. Compact selection. Quiet, precise checkout.

A fresh take on frozen.

Introduce the food, explain the service and give customers a clear way to start.

COOKT

JERK SPICE. ROASTED PEPPERS.

Jamaican Rasta Chicken Pasta.

Jerk chicken, creamy penne and roasted peppers.

The menu How it works Our food

My COOKT 7

1 - Order type → 2 - Build your box → 3 - Review & delivery

BUILD YOUR BOX

How would you like to order?

Subscribe for regular deliveries, or order a single box.

☒ **Subscribe**

Weekly, every 2 weeks, or monthly.

3 free meals with your first order.

\$50 gift card after 4 qualifying orders.

☐ **One-time order**

One box. No recurring charge.

Delivery frequency

Every 2 weeks

Renews every 2 weeks. Make changes at least 24 hours before renewal. [Subscription terms](#)

Choose meals →

Retain COOKT's order type → meals → review sequence. Keep one-time and subscription terms distinct.

CURRENT → PROPOSED

Two order types.

Keep both. Use "Subscribe" and "One-time order" consistently.

Three schedules.

Weekly, every 2 weeks, monthly. Monthly stays monthly.

One relevant offer.

Show the three free meals on the subscription path. Keep the one-time total free of subscription promises.

Proposed refinement: ask for an explicit choice instead of preselecting a subscription.

Review. Then order.

Keep the existing Shopify checkout and enabled payment methods. This layout shows the proposed hierarchy; exact customization depends on the merchant plan.

PRODUCT PAGE / EXISTING BOX RETAINED

Make the benefits easy to follow.

A proposed rewards view for the offers COOKT already promotes. Each benefit keeps its own balance and terms.

EXISTING OFFER

Orders, not deliveries.

The signup screen promises a \$50 gift card after four orders. Delivery events should not become the reward trigger without a commercial decision.

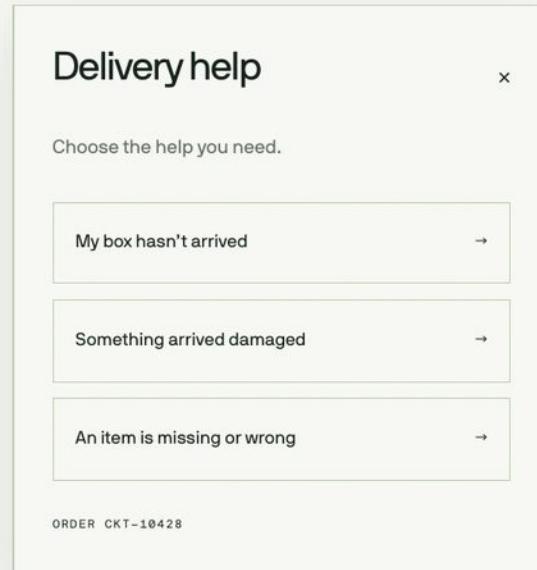

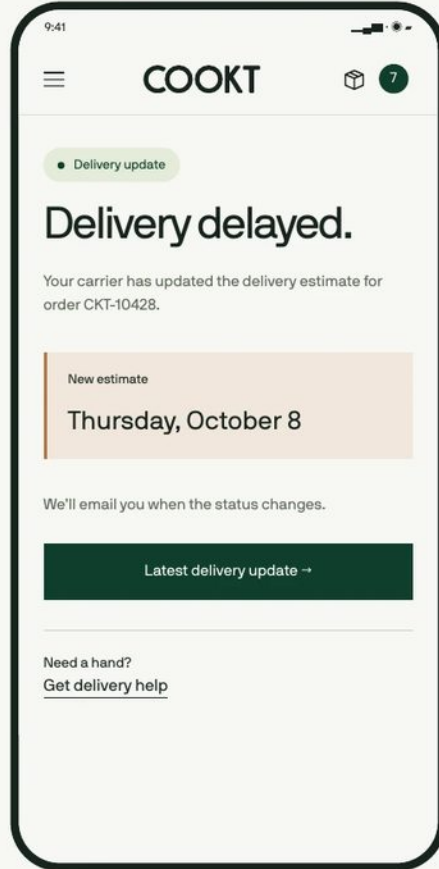

POTENTIAL CONFIGURATION

Use Skio's milestones.

Skio supports order-based reward progress. Check the active offer and portal settings before adding a custom counter.

"Clean Plate Club" can name this area. The name is a proposal; a plate collection or new earning rule would be a separate development.

A clear next step when plans change.

Keep carrier estimates specific and connect customers to COOKT's existing support routes.

MISSING DELIVERY

Tracking, then a claim.

Use the existing delivery FAQ and claim route. Keep the order number close to hand.

DAMAGE OR WRONG ITEMS

A direct route to support.

Email support@getcookt.com with the order number, details and photos of damage.

ADDITIONAL DEVELOPMENT

One form, prefilled.

An in-account case form needs an integration. It is not required for the first design release.

What changes. What stays.

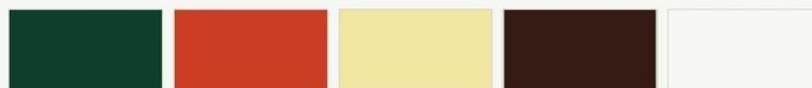

The ordering model remains. Most of the proposal improves presentation, hierarchy and access to existing functions.

TOUCHPOINT	COOKT TODAY	PROPOSED EXPERIENCE	IMPLEMENTATION
Discovery	Homepage, menu, email and SMS signup	Food-led layout; optional marketing signup	Theme and campaign templates
Order type	Subscribe or one-time; 3 delivery schedules	Same sequence; clearer terms; explicit choice	Existing builder UI changes
Build a box	7-30 meals; discounts at 12 and 18	Inline quantities; persistent box summary	Reuse pricing and cart rules
Checkout	Shopify checkout	Consistent branding and order summary	Branding editor; advanced layout depends on plan
Account	Shop/email login; orders, subscriptions, profile, credits	New-account state and subscriber overview	Skio portal styling/configuration first
Rewards	3 free meals; \$50 after 4 orders; credits; referrals	Separate balances and visible order progress	Check Skio milestone setup and offer rules
After delivery	Tracking, FAQ/claims and support email	Coordinated messages and account link in the box	Existing channels; custom cases are additional

Observed public pages and supplied account screenshots · September 29, 2026. Platform capability does not confirm merchant configuration.

A consistent set of controls.

Keep buttons, quantities and status clear across the more expressive brand layouts.

Green is the brand anchor. Dish colors work as larger editorial fields and smaller identification cues.

Design review, grounded in research.

Recommendations informed by Nielsen Norman Group and Baymard Institute. This is our assessment, not an external review.

JAKOB NIELSEN
NIELSEN NORMAN GROUP

Can I see what just happened?

The box updates in place. Delivery has a visible status. Removing a dish and skipping a box are reversible.

Keep status specific. "Saved" must mean the order record changed, with an effective date.

10 usability heuristics ↗

EDWARD SCOTT
BAYMARD INSTITUTE

Can I finish without detours?

Quantity controls live on meal cards. Keep enabled checkout methods. Account sign-in stays separate from marketing signup.

Keep quantity changes immediate. Test account prompts without changing the existing order-type sequence.

Grocery quantity controls ↗

Delayed account creation ↗

SARAH GIBBONS
NIELSEN NORMAN GROUP

Does the service keep its promise?

The website, email, package and account share an order reference. Shipment and delivery remain distinct events.

Design the operational handoffs alongside the screens. A polished tracking page cannot repair contradictory order data.

Service blueprints ↗

Published research informs these recommendations. No customer study or conversion uplift is claimed.

Start with the existing tools.

Prioritize the storefront, builder and portal. Add custom functionality only where the current setup cannot deliver the experience.

01 / DESIGN & CONFIGURATION

Reuse the program.

Apply the visual system to storefront and lifecycle templates. Restyle the builder and Skio portal. Keep existing login, order management, discounts and support routes.

Skio portal branding ↗

03 / COMMERCIAL CONFIRMATIONS

Resolve the conflicting terms.

The site says both “four orders” and “four weeks.” Confirm qualifying orders, gift-card issuance and any offer commitment. The cancellation policy has a separate “First Week Free” exception; its relation to the current offer is unconfirmed.

Current offers ↗ · Subscription policy ↗

02 / CHECK THE SETUP

Confirm what is enabled.

Verify Skio portal version and reward milestones. Check Shopify plan and checkout permissions. Styling is available; an exact custom checkout layout may require Plus.

Skio reward milestones ↗ · Shopify checkout ↗

04 / ADDITIONAL SCOPE

Price new features separately.

Saved favorites, a custom support form and any delivery-based plate collection need capability checks or development. None is required to refresh the existing journey.

Mocks use four launch dishes and sample prices, dates, shipping and customer data. The production DTC assortment, product declarations and calculated charges remain authoritative.
